

CHARAN THOTA

Software Developer | AI & ML Engineer

Charan4265@gmail.com | +91 91829 98536 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerRank](#) | [CodeChef](#)

PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech graduate in Artificial Intelligence & Machine Learning with hands-on experience building full-stack web applications and AI-powered solutions. Proficient in Python, Django, PostgreSQL, and cloud deployment, with a strong foundation in deep learning and data-driven problem solving. Passionate about creating scalable, real-world software products that deliver measurable impact, and eager to contribute to a dynamic software development team as a fresher.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

CGPA: 7.0

Aditya College of Engineering

2022 – 2026

TECHNICAL SKILLS

Languages:	Python, JavaScript, HTML5, CSS3, SQL
Concepts:	OOP, DSA
Databases:	MySQL, PostgreSQL
Frameworks & Libraries:	Django, Bootstrap 5, NumPy, Pandas, LLMs (Large Language Models)
Tools & Platforms:	Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Cloud & Deployment:	Render, Streamlit
Microsoft Tools:	Microsoft Excel, Microsoft Word
Soft Skills:	Problem Solving, Team Collaboration, Communication, Time Management, Adaptability

PROJECTS

ShopHub — Multi-Vendor E-Commerce Platform

[Live Demo](#) | [GitHub](#)

Tech Stack: Python | Django | PostgreSQL | Bootstrap 5 | Git | Render

- Built a live marketplace similar to Amazon/Flipkart enabling multiple sellers to register stores and buyers to order products
- Implemented 3-role authentication system — Buyer, Seller, and Admin — with separate dashboards for each role
- Developed complete order management system with cart, checkout, Cash on Delivery payment, and order tracking
- Deployed live on Render cloud with PostgreSQL database integration

Automated Steel Rebar Detection using Deep Learning

[Live Demo](#)

Tech Stack: Python | PyTorch | OpenCV | Faster R-CNN | Hugging Face

- Built an AI model to detect and count steel rebars in images using Faster R-CNN object detection architecture
- Used PyTorch and OpenCV for image processing, model training, and real-time inference pipeline
- Implemented automated size estimation and cost calculation from construction site images
- Deployed on Hugging Face Spaces for public access and demonstration

INTERNSHIP EXPERIENCE

Google Cloud Generative AI Intern

6 Months

SmartBridge & APSCHE | Remote

- Developed AI solutions using Large Language Models (LLMs) and Generative AI models for real-world use cases
- Integrated cloud-based AI services using Google Cloud Platform (GCP) for scalable AI deployments
- Strengthened understanding of prompt engineering, fine-tuning strategies, and AI model workflows

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Web Development – IBM (2024)
- Machine Learning with Python – EDX (2024)
- SQL – Mind Luster (2024)
- Solved 100+ problems on LeetCode — Strong foundation in DSA & Problem Solving
